Introduction

This is a complete step-by-step guide for migrating from GoDaddy IMAP to Office 365 BitTitan's migrationwiz. Only mail items are migrated during the migration. If you have any calendars or contacts you want brought over, you will need to export them as PST files.

Planning Phase 1: Gather All the Necessary Credentials

1. Credentials Checklist
 - a. Office 365 Global Admin Credentials
 - b. GoDaddy Admin Credentials
 - c. All users passwords part of the migration

Note BitTitan comes with a tool called Deployment Pro which reconfigures Outlook profiles after the migration. This can be pushed out either through GPO or email. If you are going to be pushing this out via GPO you will additionally need:

- e. Credentials remote into Primary DC (If applicable)
- f. Enterprise Admin Credentials for Primary DC

Planning Phase 2: Gather and Audit all Users part of the Migration

1. Login to the GoDaddy portal with Admin Creds

Registered Users

Have an account? Sign in now.

2. Scroll Down to “Workspace Email”, Click “Manage All”

Workspace Email Manage All >

	Email Forwarding - 100 Pack Free email forwarding for on-sitemed.com	Options	Sign in
	Personal Email Empty 2	Options	Sign in
	Unlimited Business Email On-Site	Options	Sign in

Expires 6/17/2018 Renew

3. You will see your List of Email Address', Click on Export:

Unused Plans

4. Export to CSV

5. Edit the CSV to contain 3 Headers:
 - a. UserName
 - b. EmailAddress
 - c. Password

	A	B	C	D	E	F
1	EmailAddress	UserName	Password			
2	starfox@wrajrecords.com	Star	Symm3r1969!			
3	Dkong@wrajrecords.com	Donkey	Matrix@1			
4						
5						
6						
7						

Note You can gather Passwords from Users or choose to reset them in the GoDaddy Portal:

Prep Work Phase 1: Prepare Office 365

1. Create a net new office365 tenant, tenant will be spun up with the defaulted .onmicrosoft.com domain. This can be spun up direct with Microsoft or purchased through a CSP provider
2. Go to Setup>Domains>Add Domain
3. Verify Domain with TXT record provided
4. Select "I will manage DNS records myself" and checkmark the box "Skip this step" when it ask to place all the remaining DNS settings for you
5. Domain will say "possible service issues". This is ok. We will add the remaining records after we cut over MX Records
6. Add Users Manually, Bulk Upload with a Powershell Script or CSV, or with AD Connect

a. Powershell Script

#Connecting to Exchange Online Account#

```
$credential = Get-Credential

Import-Module MsOnline
Connect-MsolService -Credential $credential

$exchangeSession = New-PSSession -ConfigurationName Microsoft.Exchange -ConnectionUri
"https://outlook.office365.com/powershell-liveid/" -Credential $credential -Authentication
"Basic" -AllowRedirection
Import-PSSession $exchangeSession -DisableNameChecking
```

Create a CSV with the Following Headers:

- UserPrincipalName
- FirstName
- LastName
- DisplayName
- Password

#Bulk Import Users with Passwords#

```
Import-Csv -Path 'FilePath' | foreach {New-MsolUser -UserPrincipalName
$_.UserPrincipalName -FirstName $_.FirstName -LastName $_.LastName -DisplayName
$_.DisplayName -Password $_.Password -ForceChangePassword $False}
```

#Add Alias to Users#

```
$LiveCred = Get-Credential
$Session = New-PSSession -ConfigurationName Microsoft.Exchange -Connecti
dential $LiveCred -Authentication Basic -AllowRedirection
Import-PSSession $Session
$users = Get-Mailbox
foreach ($a in $users) {$a.emailaddresses.Add("$(($a.alias)@domain.com")}
$users | %{Set-Mailbox $_.Identity -EmailAddresses $_.EmailAddresses}
```

#Add Distribution Lists with Members#

```
Import-Csv -Path 'File Path.csv' | foreach {New-
Distributiongroup -Name $_.Name -PrimarySmtpAddress $_.Address
}

Import-Csv 'File Path.csv' | foreach {Add-
DistributionGroupMember
-Identity $_.DL -Member $_.Alias}
```

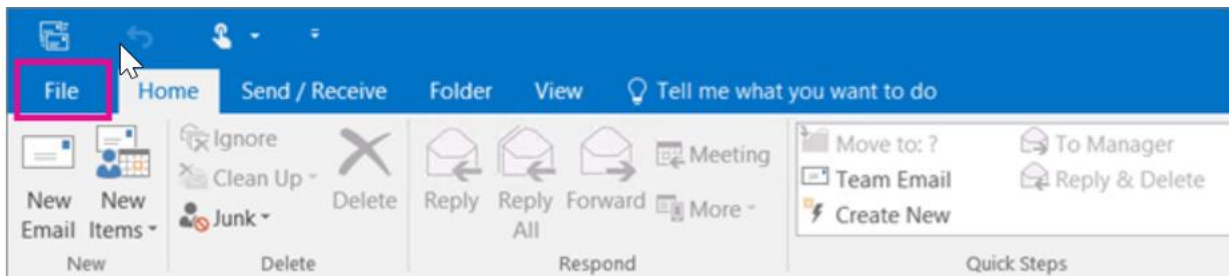

b.AD Connect Setup: <https://docs.microsoft.com/en-us/azure/active-directory/connect/active-directory-aadconnect-get-started-custom>

7. Assign Licenses to Users

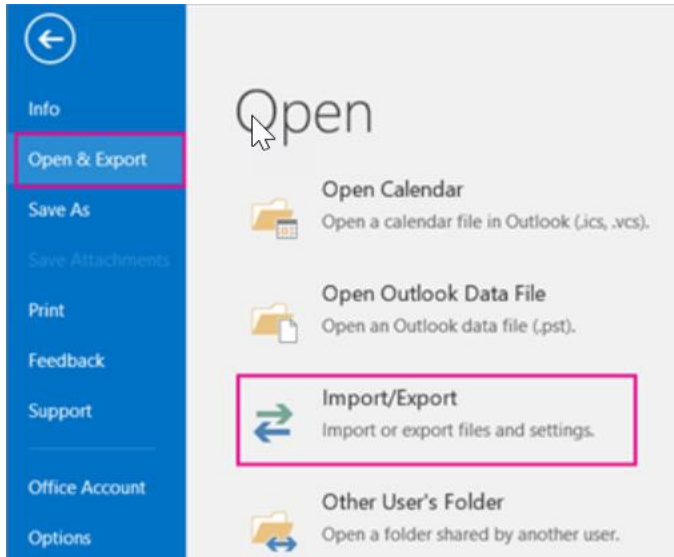

Prep Work Phase 2: Export Calendar/Contact Info to PST file

Recall with IMAP we cannot migrate Calendar and Contract data. For this reason, I like to export the data and save a local copy of the OST file for the Outlook profile.

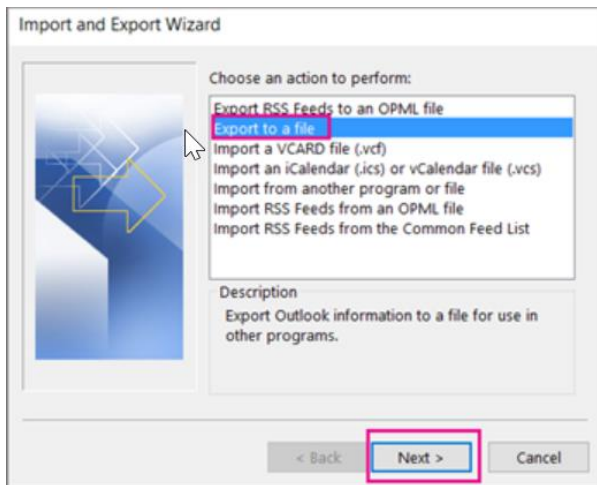

1. Open Outlook
2. At the top of your Outlook ribbon, choose File

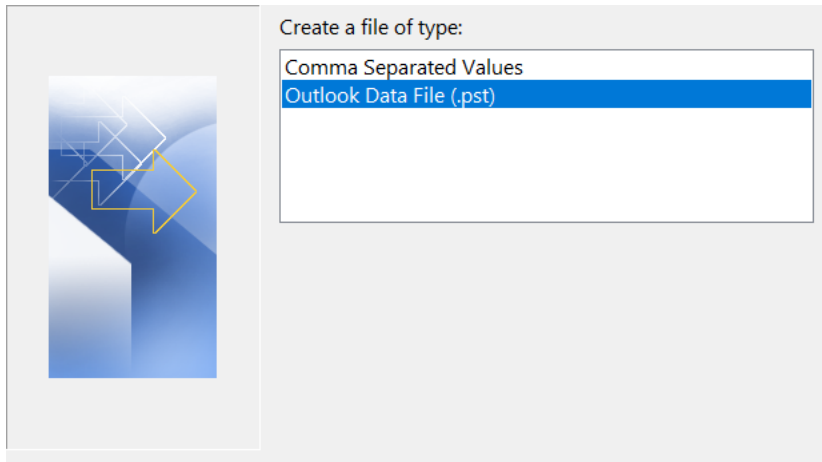

3. Choose Open & Export > Import/Export

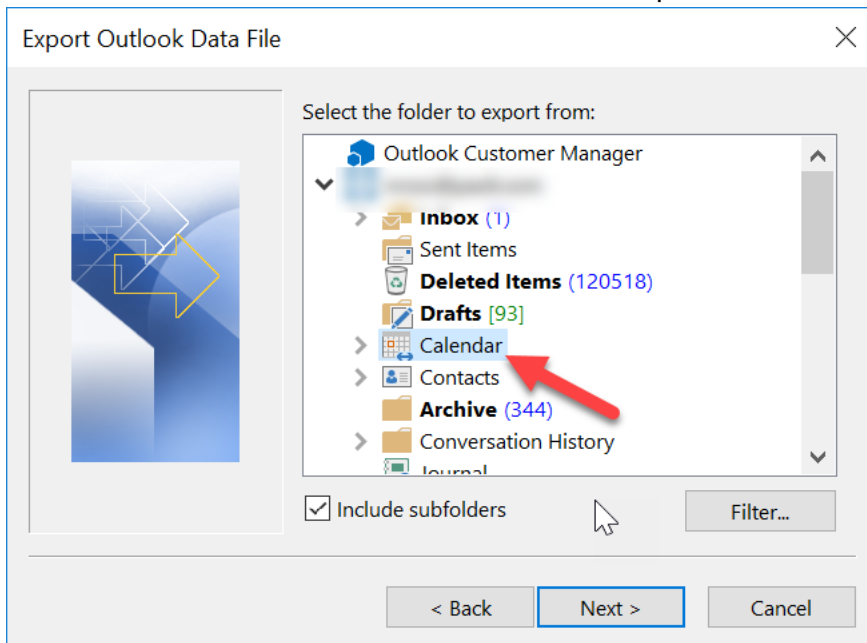

4. Choose Export to a file

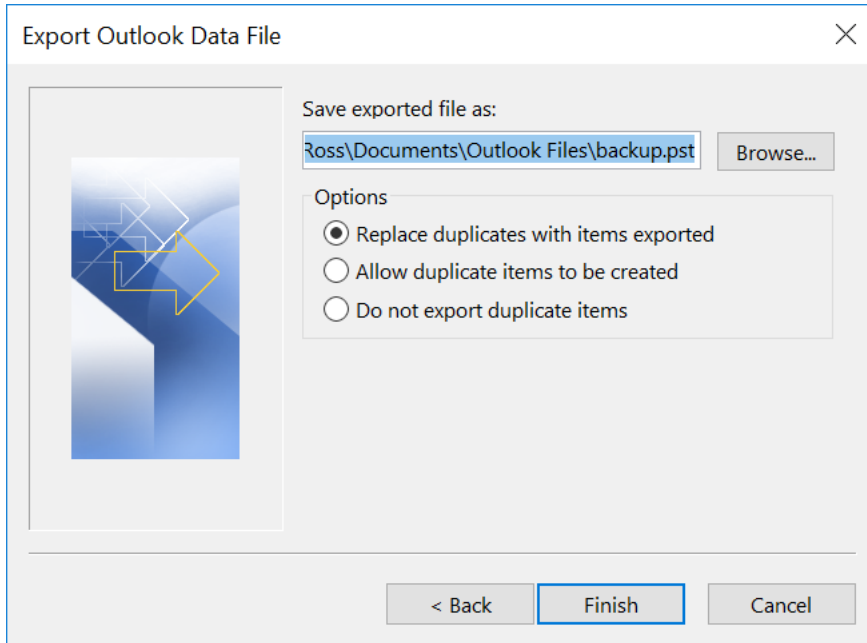

5. Click Outlook Data File (.pst), and then click Next.

6. Select the name of the email account to export>Select Calendar

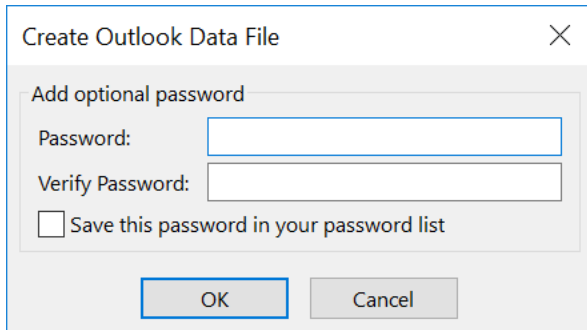

7. Click Browse to select where to save the Outlook Data File (.pst).

8. Leave the Default options and Click Finish

9. Since this is a new PST file you will need to create a password to access it

10. Follow the Same Steps for your Calendar Items

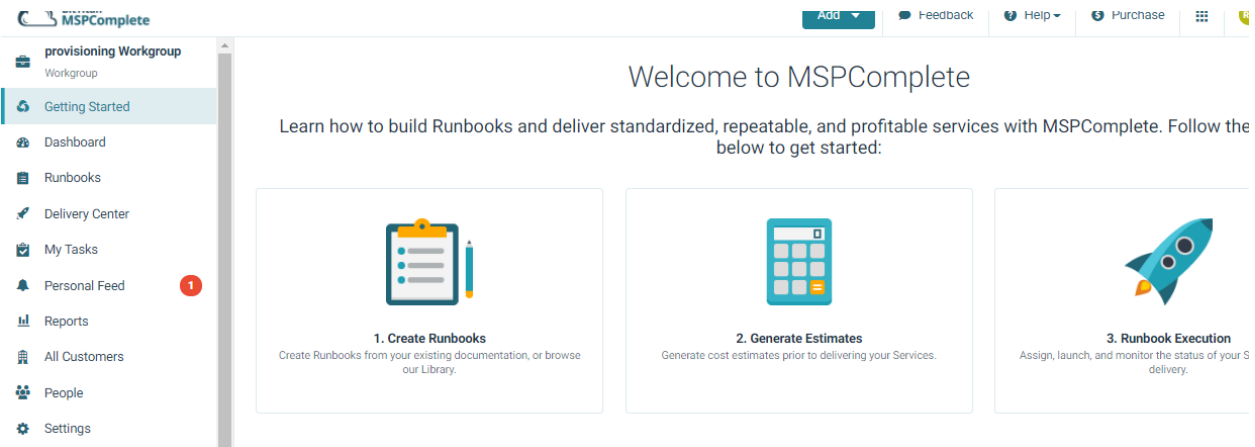

Prep Work Phase 3: Push out DMA agent

BitTitan comes with a deployment pro agent that automatically configures outlook profiles. This will bring over **autofill settings** and **signatures** for all users. There are two options to push this out:

- a. GPO
- b. Email

Note If we are deploying the agent via gpo, users will just receive a popup asking them to authenticate and will reopen outlook after cutover. If we are pushing the agent out via email, users will receive a message in which they will have to click on a link to install the agent on their device

1. Login to the BitTitan Portal and Click All Customers on the left-hand column

2. Click Add Customer>Fill out Customer Name and primary Domain>Click Save

Add Customer

▼ Customers

Details

Workgroup Name
provisioning Workgroup

@ Primary Email Domain

Company Name

Primary Location (Optional)
Select Country ▼

City (Optional)

Primary Industry (Optional)
Select Industry ▼

Company Size (Optional)
Select Company Size ▼

Follow Steps **3-14** if you are choosing to deploy the agent via **GPO**

3. Remote into Primary DC
4. Open Browser and Login to BiTitan.com
5. Go to All Customers>View Users on the Customer you created
6. Click “Enable the Device Management Agent”

Add Users to begin managing your Customers and delivering Services.

Add Users Through an Endpoint

Automatically add Users and Groups from existing cloud services.

Enable the Device Management Agent

Deploy a lightweight Agent on devices to import Users.

Add Users in Bulk

Import Users through a CSV file, without accessing your Customer's production environment.

Add Users with Quick Add

Add a User to MSPComplete.

7. Follow the steps from the following KB Article which walks you through setting up a new share, placing the exe in the share, creating the gpo, and scheduling it to run :<https://help.bittitan.com/hc/en-us/articles/115008110847>

Add Users with a Device Management Agent

By using the Device Management Agent, you agree to comply with BitTitan's User Agreement.

Device Management

Instructions

Installing with a Group Policy Object (GPO).

1. Save the Device Management Agent setup file (i.e., BitTitanDMASetup_60577C0A954BA572_.exe) to a network share folder.
The folder needs to be accessible for all Users on the network.
2. Create a GPO that executes the DMA setup file on an Active Directory Organizational Unit's computers with an immediate scheduled task.

Script Parameters:

[Copy to Clipboard](#)

```
\\path-to-  
BitTitanDMASetup_60577C0A954BA572_.exe]BitTitanDMASetup_60577C0A954BA572_.exe
```

8. Monitor users that successfully have the agent installed by going to Customers>Select customers>Manage>Device Management>Deployment pro

You will need to put in the destination domain and add the 365 endpoint

DeploymentPro
Cancel Save and Continue

What is DeploymentPro, and how does it work?

DeploymentPro is a cloud-based solution that remotely configures and manages Users' Outlook profiles.

- To start using DeploymentPro, launch the Device Management Agent.
- Once installed on Users' devices, set up the module to automate the configuration of all Users' Outlook profiles.

[Launch DeploymentPro for UserActivation to View Legacy Projects](#)

Module Configuration

Destination Domain Name

The field cannot be left blank.

Select Destination Endpoint
Office365 + ▾

Once users start to login to their computers, their device will be registered and their primary upn will be listed "Primary Email Address" column

[Redacted]	[Redacted]	Not scheduled	1	0	0	0	0

9. Users computers will be listed and will have a "heartbeat". Once a user signs into the device their email will be tied to the device in a one to one relationship.

Home > Customers > Cardinal Transport > Device Management > Computers

Services Computers

80 Computers

Computer Name ↓	Number of Users	Agent Status
AR-004	1	✓
ARDEB	1	✓
AS400CONSOLE-PC	1	✓
BILLINGSARAH	1	✓
BROKERAGEJD-CR	1	✓
BROKERAGEJD-CR	1	?

* If a status shows a ? symbol it most likely means the computer is shut down and the tool hasn't been able to find a heartbeat in over 4 hours*

CRDTAPP	2	✓
CRDT-AR-DLS	1	?

11. Once all users have populated and have the DMA agent installed, Schedule the cutover date for the agent to run on their computer. (This is after you point MX records to office365)

Schedule DeploymentPro

Schedule for Profile Cutover

This is the date and time scheduled for DeploymentPro to run on your Users' machines. The module will install on their devices at the next heartbeat, and then run silently until:

Select a date.
May 11th, 2018 11:30am

The time specified is (America/Denver).

Subscribed Users (no license required): 1

License Consumption

Users	License per User	Total Licenses Required
1	1	0

User Destination Email

The Destination email address is the email address of the new profile after it has been configured.

Source Email	Destination User Principal Name
<input type="text"/>	<input type="text" value="@crtrans.biz"/>

Cancel

Schedule Cutover

Note If there are multiple domains involved you will have to go to "settings" in the deployment pro page and change the domain for the users who need the separate domain

12. Once the agent is scheduled successfully, all users should change to a status of "running"

25 Total Users		25 Total Devices		1999059 Licenses Owned	
<input type="button" value="Schedule Cutover"/>					
Primary Email Address	Destination UPN	Module Status	Not Started	Scheduled	Running
		Scheduled on Apr 30, 2018 9:15am	0	0	0
		Scheduled on Apr 30, 2018 4:00pm	0	0	0
		Scheduled on Apr 30, 2018 9:15am	1	0	1
		Scheduled on Apr 30, 2018 9:15am	0	0	1

13. If the status does not say "running" but remains in "scheduled" reschedule again until it moves into a **running status**

14. If users are not being picked up with the GPO, troubleshoot with one remote end user:

- Run Gpresult on their computer to see if the GPO is running
- If the GPO is running, try running the exe manually to see if it is blocked but a firewall setting
- If it is blocked, then create an exception to the firewall to allow the exe to run.
- If it is not being blocked check to see if there are any web proxy settings that may be blocking communication back to bittitan

15. *This completes the steps for setting up DMA via GPO. If you have completed this successfully then move on to the next section. If you are deploying the agent via email, follow steps 16-26.*

Deploying DMA via EMAIL

16. In the BitTitan portal, go to All Customers and select the customer you created

17. Click Add Users Through an Endpoint

Add Users to begin managing your Customers and delivering Services.

- Add Users Through an Endpoint**
Automatically add Users and Groups from existing cloud services.
- Enable the Device Management Agent**

MIGRATION ERRORS

⚠ Your migration failed checking source credentials. Office 365 user names should always be specified as email addresses. Ensure user names are specified as email addresses.

Source Server 8 minutes ago

[Learn More](#)

Click on “Learn More” to access BitTitan’s Relevant kb articles specific to the error:

OFFICE 365 USER NAMES SHOULD ALWAYS BE SPECIFIED AS EMAIL ADDRESSES Open In New Window

Office 365 user names should always be specified as email addresses: This error indicates that the specified Office 365 user name is invalid. Office 365 requires users to log in with an email address, not a user name as in "John Doe" or "domain\johndoe".

Resolution:

We recommend the following:

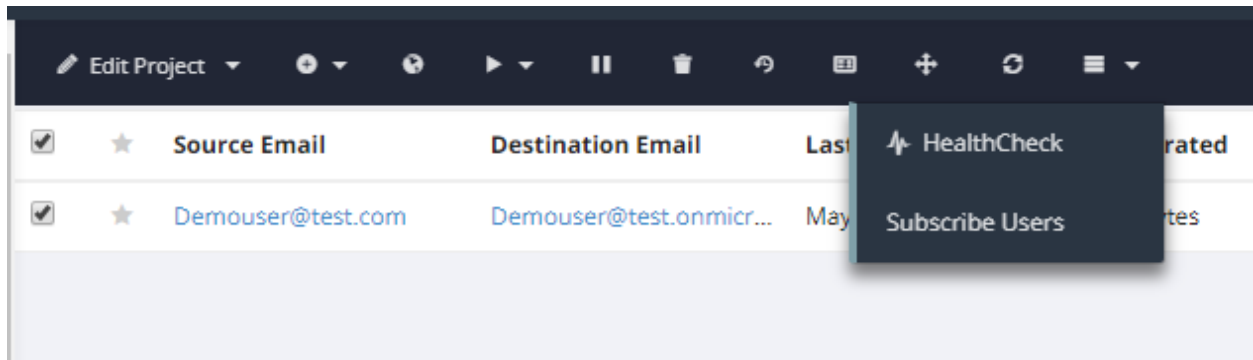

1. If using administrative credentials for Office 365, check the admin user name specified on your project.
2. If not using administrative credentials for Office 365, check the mailbox owner user name specified on the mailbox.
3. In all cases, make sure the user name work when logging in at <https://login.microsoftonline.com>.

Migration Phase 1

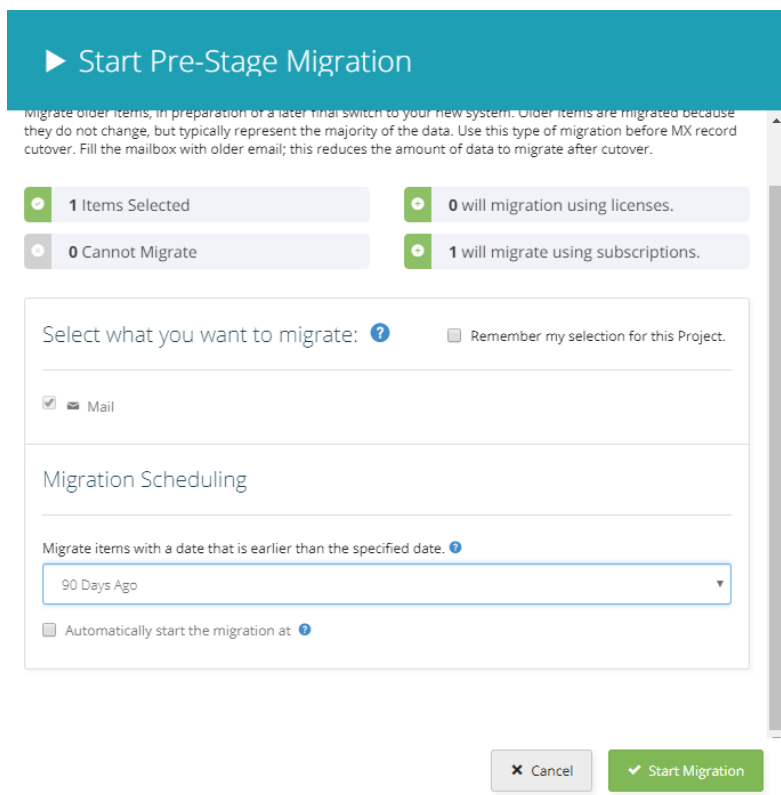

1. Preferably start at beginning of the week to bring over a bulk of the mail, plan for domain cutover on Friday evening

Note During a pre-stage Pass BitTitan is simply making copies of mail in 365. The user will experience no loss of data during this time*

2. Select All Users>Click on the start button>Pre-stage Migration

3. Select a time range from the dropdown of prior to 90 days>Start Migration

4. This will give you a status bar and show the amount of data moved over in the “bytes” column. If any users fail, it’s usually do to server timeout. Simply rerun the pre-stage pass on these users to restart where it left off. If you click on any user’s name, you can see metrics like upload speeds:

MIGRATION HISTORY

Verify Credentials ✔ Success 3 few seconds

Start: May 9, 2018 2:51pm
End: May 9, 2018 2:52pm

Full Migration ✔ Success 3 minutes

Start: May 8, 2018 6:51am
End: May 8, 2018 6:55am

Full Migration ✔ Success 2 minutes

Start: May 7, 2018 8:11pm
End: May 7, 2018 8:13pm

Full Migration ✔ Success 2 minutes

DURATION AND SPEED

Statistic	Source	Destination
Active Duration	6 minutes	a few seconds
Passive Duration	Less than a second	6 minutes
Data Speed	3 MB/hr	146 MB/hr
Item Speed	97 items/hr	5,597 items/hr

🔍 Performance Analysis

5. Once the pre-stage migration has run for all users and is in a "Completed" Status

		May 8, 2018 6:53am	441.16 MB	No	0	✔ Completed	
		May 8, 2018 6:53am	506.66 MB	No	0	✔ Completed	
		May 8, 2018 6:53am	6.09 GB	No	23	✔ Completed	
		May 8, 2018 6:52am	29.49 MB	No	0	✔ Completed	
		May 8, 2018 6:57am	25.17 GB	No	31	✔ Completed	

6. Next we are going to perform a full migration to bring over the remaining copies of mail. Select All users>Click on the start button>Full Migration

The screenshot shows a software interface with a dark header bar containing icons for 'Edit Project', play, pause, stop, refresh, and other controls. Below the header is a table with columns: 'Source Email', 'Last Updated', 'Migrated', and 'User Migration Bundl...'. The first row shows 'Demouser@test.com' with 'Last Updated' as 'May 9, 2018 2:53pm', 'Migrated' as '0 bytes', and 'User Migration Bundl...' as 'Yes'. A context menu is open over the table, listing options: 'Verify Credentials', 'Trial Migration', 'Pre-Stage Migration', 'Full Migration', and 'Retry Errors'. The 'Full Migration' option is highlighted.

8. Confirm all users go into a "Completed" Status

Migration Phase 2: MX Cutover

1. At Designated time, login to DNS provider and change you MX records to point to Office365
 - a. You can find this in the 365 Admin Center by going to Setup>Domains
 - b. Office365 MX record follow this format **Domain-com.mail.protection.outlook.com**
2. Run another Full Pass. This will perform a **delta sync** to pull over any residual data that may have been missed.

Migration Phase 3: Post Migration Cleanup

1. Audit Destination Environment Mailflow for Inbound/Outbound Mail
2. Login to BitTitan>Go to All customers>Select customer>Manage>Device Management>Deployment Pro
3. Make sure DMA status has moved into "Completed" status. If in "error" status it means the users failed authentication 3x. Reschedule the tool to run at the next time interval available

Customers > CEI > Device Management > DeploymentPro

DeploymentPro Settings

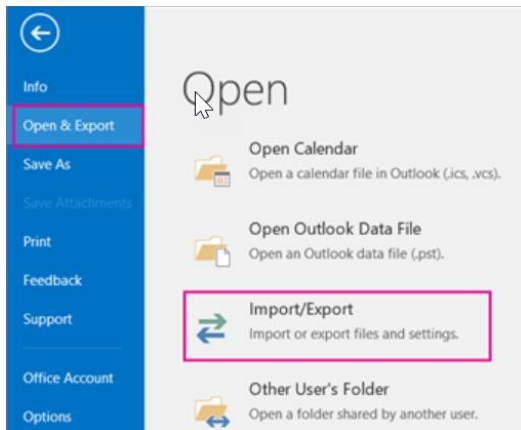

Use BitTitan PowerShell to schedule DeploymentPro for a large number of mailboxes. [Read more.](#)

- Relaunch Outlook and you will see your new profile listed. You can now import your PST file into the new outlook profile. Go to file>Open&Export>Import/Export

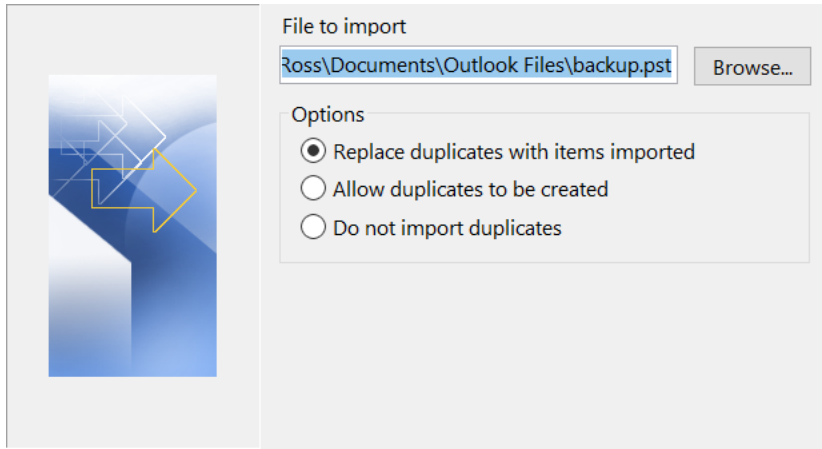

5. Select Import from another program or file

6. Select PST

7. Browse for the file path in which you saved the Calendar/Contact Exports

8. Import the file into the correct profile

9. Verify your Calendar/Contacts Imported Successfully

10. Send out guides on reconfiguring mail on Iphone/Andriod:
