Lighthouse **Description Create Users** Create users in Entra ID **Assign Licenses** Assign Licenses to users Apply group membership templates to users to **User Management** Apply Group Membership assign them to the same groups as another Templates user in the org Assign a manager to a users Assign Manager **Reset Password** Reset the users password Block Sign-in Block a sign-in for the user **Assign Roles** Assign priviledgd roles to the user **Revoke Sessions** Revoke all active sessions for a signed in user **Schedule User Creation** Delay the user creation until a specificed date/time Convert a user mailbox to a shared mailbox Convert to Shared Mailbox Send an MFA push to the user to fulfill on Microsoft Send MFA Push Authenticator Add/Remove from Group Add or remove a user from an existing group Set Out of Office Set the Out of Office message for a user Set Per-User MFA Set the per-user mfa setting for a user Add OneDrive Shortcut Add a shortcut to a SharePoint site to a users OneDrive Enabled exchange online archiving for a user **Enable Online Archive** Create a TAP for a user. Most commonly used in **Create Temporary access** password new user onboarding Disable Email Forwarding Disable email-forwarding on a users mailbox Require MFA re-registration Require the user to re-register MFA methods **> Delete Users** Soft delete a user from Entra ID **Invite Guest** Invite guest users to Entra ID **Bulk Add Users** Bulk upload users to be added in Entra ID Automate user offboarding along with common Offboarding Wizard/Automation task like converting their mailbox to shared, **✓** setting automatic replies, etc. **Bulk Add Users** Bulk upload users to be added in Entra ID Provide just in time access for a new or existing JIT Admin account to perform admin work within a tenant Leverage a list of reports around a tenant/users to **BEC Investigation** help with business email compromise investigation **/ Enable Litigation Hold** Enable a litigation hold on a users mailbox Add/Remove Groups Add or delete groups from a tenant Hide or unhide groups from the global address Hide/Unhide from GAL list for users Group Management Create group templates to use the same naming conventions in tenants. Helpful for creating **Group Templates** consistency in policies like conditional access **✓** Device inventory in Entra ID and/or Intune **Device Inventory** Manage and deploy configuration profiles in Intune **Configuration Profiles Compliance Policies** Manage and deploy compliance policies in Intune Script Deployment Ma nage and deploy PowerShell scripts in Intune Manage and deploy App Protection policies for **App Protection** MAM in Intune **Autopilot Profile** Manage and deploy autopilot profiles Manage and deploy the enrollment status page Autopilot status page for users in Intune Add Autopilot Devices Add one to many autopilot devices to a tenant **Application Deployment** Manage and deploy applications to Intune Configure and deploy Defender for Business Deploy Defender **/** within a tenant Enterprise application inventory for internal and **Enterprise Application Inventory** 3rd party service principals **App Consent Request** View and monitor app consent request from users Application Management Deploy Microsoft 365 apps Configure and deploy Microsoft 365 apps via Intune Configure and deploy 3rd party apps leveraging Deploy 3rd Party Apps package libraries Deploy MSP apps Deploy common MSP tools like RMM and Huntress Uninstall applications from devices **Uninstall Apps** List a software inventory of apps installed on devices **Software Inventory** including vulnerabilities from Defender Deploy new service principals or existing service **Deploy Service Principals** principals across tenants Add/Remove OneDrive Permissions Add or remove permisisons to a users OneDrive Add/Remove Teams Add or remove Teams from a tenant Add Remove Team Add or remove members or owners to a Team or Members/Owners channel Add/Remove SharePoint Sites Add or remove sharepoint Sites from a tenant Add/Remove Site Add/Remove Site Members or remove site Members/Admins members Admins from a tenant Configure and deploy standard policies or Standards/Baseline Management **✓** baselines to a tenant Clone Baselines Clone policies from one tenant to deploy to another **Policy** Management Detect drift or deviations in baselines over time **Drift Detection** Templatize conditional access policies to push **Conditional Access Templates** to one or many tenants Manage named location policies in a tenant Named Location Management "What if" functionality to see what conditional access Conditional Access Policy Tester policies would apply based on sign-in properties Remediation Automate remediation on demand or as part of drift detection Temporarily exclude users from **CA Vaction Mode** Condtional Access policies when they go on vacation Add Shared Mailboxes Add new Shared Mailboxes **View Storage Consumption** View mailbox size and current consumption **Edit Calendar Permissions** Edit calendar permissions for a user Mailbox Management Hide/Unhide from GAL Hide or unhide a user from the global address list Set Send/Receive Quota Set send/receive quota for the tenant or user Set Quota Warning Level Set quota warning level for the tenant or a user **Room Management** Manage rooms in a tenant Add/Remove Contacts Add or remove contacts in a tenant **View Inbox Rules** View inbox rules for users View and manage the quarantined messages View/Manage Quarantine **✓** in a tenant Tenant Allow/Block Lists View and manage the allow/block lists within a tenant Mailbox Restore Wizard Restore soft deleted mailboxes in a tenant Analyze email messages to quickly identify Message Viewer information such as the headers and source Test messages to quickly identify email delivery issues Mail Test Manage Transport Rules Manage and deploy transport rules Spam Filter Management Manage and deploy anti-spam policies Backup existing configurations in a tenant to **Configuration Backup** restore in the event of unwanted drift Onboarding wizard to apply baselines to a tenant **Tenant Onboarding Wizard** Management and proper GDAP configuration Wizard to offboard a tenant from partner center, **Tenant Offboarding Wizard** including existig GDAP relationships **GDAP Invite Wizard ✓** Configuration wizard to generate GDAP invitations AutoExtend GDAP Relationships Manage the Autoextend setting on GDAP relationships **Granular GDAP Permission** Dicate what RBAC permissions are scoped to GDAP roles Assignment Terminate GDAP relationships with customers **Delete GDAP Relationships** Explorer potential sales opportunities for customers **Sales Opportunity Explorer** with analysis of existing licensing and usage MFA adoption across per-user mfa, security MFA Adoption defaults, and conditional access Reporting Risky Users Risky users and risk detections within a tenant Self-Service Password Reset Self-Service password reset registration percentrage Defender Incidents/Alerts Active incidents and alerts from defender Recommendations for vulnerabilities coming **Vulnerability Recommendations** from defender Existing software vulnerabilities and public Software Vulnerability exploits from apps installed on devices Device Compliance Device compliance across devices in Intune Defender AV status across devices, including **Defender AV Status** any active malware Review the status of the Cloud PCs assigned to your Windows 365 Devices tenants, including network connections, checks that have failed, and provisioning status. Windows Event Logs Review windows event logs Windows Event Logs from Intune-managed devices on Service Health tenants where the "Deploy script to collect Windows Event Logs" baseline task has been deployed. **Device Health** Managed devices report for restarts and blue screens Authentication methods policy that list approved **Authentication Methods** MFA methods in a tenant Application crashes or application hangs across **Application Performance ✓** managed devices View tenants and devices running unsupported Office 365 Deployment or outdated office builds Secure Score Secure score data from a tenant View and monitor upcoming NCE license License Renewal Tracking renewals across subscription Track application usage across the Microsoft App/Service Usage (Teams) suite offerings Users that have not sign-in for a significant **Inactive Users** amount of time Sign-Ins Sign in logs for a tenant **Entra Connect** View and monitor on-premise provisioning errors View an monitor mailbox attributes such as **Mailbox Statistics** storage used and if archiving is enabled Message Trace View message trace settings for receipient and sender View client access settings across users such as **Mailbox Client Access Settings** if IMAP/POP is enabled/disabled **Anti-phising Filters** View Anti-phishing policies and policy settings **Malware Filters** View Anti-malware policies and policy settings Safe Attachment Filters View safe attachment policies and policy settings Safe Link Filters View safe links policies and policy settings **Shared Mailboxes with** View all shared mailboxes that have **Enabled account** sign-ins enabled **Unconsumed Licenses** View unconsumed licenses across subscriptions Domain authentication records such as SPF, Domain Health DMARC, DKIM, etc. Schedule reports to run and send externally **Scheduled Reports ✓** PDF/Excel Exports Export reports to pdf or excel **Alert Templates** Create alert templates for various types of events **Email Integration** Send alerts to specified email addresses Alerting **PSA Integration** Send alerts to PSA ticketing systems Send alerts to custom webhooks Webhook integration Monitor and alert for drift across policies or **Baseline Drift Alerting ✓** settings within a tenant Alerting for security related events coming from **Security Alerting** Defender, Entra, and Intune **Email Integration** Integration to email for alerts વૈંસ્ડ્રિક Open API Open API to consume for custom solutions (Halo/Gradient) **Integration** Integration with PSA tools **PSA Integration** Capability **Documentation Tool** (Hudu/Ninja) Integration with documentation tools (Ninja) **RMM Intetgration** Integration with RMM tools Webhooks Webhook support (Password Pusher) Other Easy of use in onboarding and getting Easy Onboarding Moderate-Difficult everything configured Moderate-Difficult Maintenance Managing updates to the application Easy **RBAC** Role-based access for user capabilities/client access **✓ ✓ / Audit Logs** Audit log of activities taken within the environment T-MINUS 365
